Address- 3809 Raut Chal, Barshi.

Full Stack developer, Java developer, Android developer

I am an enthusiastic fresher seeking opportunities in web and software development. I have a strong foundation in various programming languages, platforms, and technologies listed below. I approach problem-solving creatively and always bring energy and innovative ideas to my work.

TECHNICAL SKILLS

programming languages:

- Java
- JavaScript
- * SQL

frameworks:

- Spring
- Spring Boot

web technologies:

- HTML
- CSS
- JavaScript

Developement tools:

Android Studio Eclipse

Visual Studio Code

intellij idea

database technologies:

- MySQL
- JDBC
- Hibernate

version control:

- Git
- GitHub

PROFESSIONAL EXPERIENCE

Android developer internship Plutecoder Technologies, Barshi.
 July 2023 - oct 2023

In my internship, I gained hands-on experience with Android Studio, XML layouts. I assisted in troubleshooting and resolving issues, which enhanced my problem-solving skills. I have a strong understanding of responsive design principles and APIs, and I effectively utilize Firebase Database for efficient data management.

• full stack developer intern at kiran academy, pune.

January 2024 - pursuing

IExcited to share that I have joined the Full Stack Developer internship at Kiran Academy in Pune. During this program, I am gaining hands-on experience with core Java, collections in Java, Hibernate, JDBC, Spring, and Spring Boot. Recently, I've also started developing projects and learning front-end technologies such as HTML and CSS. Looking forward to applying these skills and contributing to impactful projects.

PROJECTS

Face Expressions Detection app.

Developed the "Face Expression
Detection App" using Android Studio,
Firebase ML Kit, and Java. The app
captures or selects images, analyzes facial
expressions with Firebase ML Kit, and
outputs the detected expression as a
percentage. Enhanced functionality and
user experience with various plugins.

Transportations App.

Developed a "Transportation App" using Android Studio and Java. The app has two user roles: provider and requester. Providers offer vehicles and services, while requesters can make specific requests. User authentication and role assignment are managed through Firebase. The app also includes a calling system for direct communication between providers and requesters.

EDUCATION

Bachelor of Technology

- HSC (2020) 62.62
- SSC (2018) 87.20
